Table of Contents

Chapter 1 — Banach spaces
1.1 Basic definitions
1.2 Lebesgue spaces
1.3 Separability and bases
1.4 Bounded linear maps

Chapter 2 — Linear functionals and Hahn-Banach theorem

Chapter 3 — The Baire category theorem and its consequences
3.1 Baire category theorem
3.2 Open and inverse mapping theorems
3.3 The closed graph theorem
3.4 The uniform boundedness theorem
3.5 Summary for Banach spaces

Chapter 4 — Hilbert spaces
4.1 Basic definitions
4.2 Orthonormal bases

Chapter 5 — Bounded operators in Hilbert spaces
5.1 Adjoint of an operator
5.2 Spectrum of bounded operators
5.3 Compact operators

Chapter 6 — Unbounded operators
6.1 Domain and adjoint
6.2 Spectrum of unbounded operators
6.3 Closed operators

Chapter 7 — Laplace operator
7.1 Distributions and weak derivatives
7.2 Lebesgue and Sobolev spaces
7.3 The Laplacian
